

FLEXSEAL

NON-WOVEN TPE TAPE

Flexseal is designed for flexible sealing and waterproofing of expansion and construction joints subject to movement cracks. The TPE band material is fused into polyester non-woven fabric for greater strength and waterproofing capability.

**Flexseal
Tape**

**Flexseal
Corner Patch**

**Flexseal
Pipe sleeves**

Areas Of Application:

- Flexible waterproofing seal of expansion joints subject to large amounts of movement in service.
- Sealing expansion joints in prefabricated panels.
- Sealing structural joints in facades.
- Sealing joints in hydraulic works, such as channels, basins, drains, pipework, etc.
- Waterproofing expansion joints in flat covering layers.

Technical Properties:

Tape Dimentions	: 120mm width x 50m length
Packaging	: 50m or 10m per roll
Joint-Tape-Corners	: Internal angles: 12 cm wide External angles: 12 cm wide.
Pipe Sleeves	: From 65mm to 120mm

Aquafin Pakistan (Pvt.) Ltd. manufacturers and develops product systems for construction markets. The company works actively in the following areas:

- Waterproofing and Restoration
- Tiles/ Natural Stone/ Screed Installation
- Protective Flooring/ Coating Systems
- Concrete Technology

Aquafin Pakistan is recognised for its development competency and is distinguished nationally with nearly 20 years in the market.

Industry professionals value the level of care provided by **Aquafin Pakistan**, along with our wide range of high-quality industry products.

In order to stay at the forefront of a continuously advancing market we are always investing in the research and development of trend-setting products.
